AYUSH BHARTI THAKALI

Full Stack Developer
GitHub | LinkedIn | Email | Website | +977-9816641224

SUMMARY

Full Stack Developer with hands-on experience building scalable, user-friendly web applications across frontend and backend layers using React, Next.js, Node.js, Express, and TailwindCSS. Skilled in designing RESTful APIs, integrating authentication, managing databases, and delivering end-to-end features through close collaboration or independent ownership. Experienced in developing real-world systems including hospital management platforms and AI-assisted applications, with emphasis on performance, maintainability, and clean architecture. Proficient in translating requirements into robust full-stack solutions using modern web technologies.

SKILLS

Languages	: JavaScript, Typescript, C, C++, Python
Frontend	: HTML, CSS, TailwindCSS, React.js, Next.js, Framer Motion
Backend & Database	: Node.js, Express.js, Supabase, MongoDB, PostgreSQL, MySQL
State Management	: Redux Toolkit, RTK Query, Context API
Tools & Dev-Ops	: Git/GitHub, Vercel, Google OAuth, Postman
Soft Skills	: Problem Solving, Technical Communication, Critical Thinking, Team Collaboration

EXPERIENCE

Frontend Developer Intern | Elevate Tech. | Pokhara, Nepal *Nov 2025 - Jan 2025*

- Contributed to the development of TrustMed, a hospital management system using React.
- Built responsive UI components and enhanced user workflows
- Collaborated with backend teams for API integration and data handling

MERN Stack Developer Intern | Brandbuilder | Pokhara, Nepal *Dec 2025 - Present*

- Contributed to the development of Receipt AI, an AI-powered receipt management system
- Developed the frontend using Next.js and implemented Google OAuth authentication
- Integrated a peer-developed AI module for automated receipt extraction and categorization
- Implemented multi-company workflow and secure access management

PROJECTS

Receipt AI – AI-Powered Receipt Management
Built the full frontend and authentication flow, and integrated a peer-developed AI module to extract, categorize and manage financial receipt information. Implemented multi-company support with secure OAuth authentication.
Tech Stack: Next.js, Typescript, TailwindCSS, MongoDB, Google OAuth, JWT

SB Thakali – Chartered Accountant Website
Designed and developed a modern, responsive website for a Chartered Accountant firm, featuring a full admin dashboard, secure authentication, and a custom blog management system. Deployed on Vercel for fast and reliable production hosting.
Tech Stack: React, Next.js, TailwindCSS, MongoDB, JWT, Framer Motion

TrackBoard – Real Time Kanban Board
Engineered a high-performance, real-time task management application with a focus on seamless data synchronization and a modern "Glassmorphism" UI. Implemented Row Level Security (RLS) to ensure private data isolation and integrated complex drag-and-drop mechanics. Production deployment on Vercel.
Tech Stack: Next.js, TypeScript, Supabase (PostgreSQL), Redux Toolkit, RTK Query, TailwindCSS, Google OAuth

News AI – Real Time News Summarization
Developed a performance-optimized news platform that provides real-time article summarization. Implemented advanced frontend architecture including DOM virtualization to handle 100+ items at 60 fps and debouncing for optimized search performance to minimize redundant API overhead.
Tech Stack: Next.js, TypeScript, Redux Toolkit, TanStack Virtual, Gemini AI, RTK Query, TailwindCSS

EDUCATION

Bachelors in Computer Engineering
Licensed Engineer (Nepal Engineering Council, NEC) *2025*
Kathmandu Engineering College, TU (74.24%) *Kathmandu, Nepal*

Higher Secondary Education (Science) *2020*
Gandaki Boarding School (3.24 CGPA) *Gandaki Province, Nepal*

Secondary Education Examination *2018*
Gandaki Boarding School (3.8 CGPA) *Gandaki Province, Nepal*

CERTIFICATIONS

JavaScript Algorithms & Data Structures by freeCodeCamp *May 2025*

Responsive Web Design by freeCodeCamp *July 2024*

Programming using Python Bootcamp by Dursikshya *July 2024*

JavaScript Bootcamp by KEC IT Club *July 2023*
