SUMMARY

Full Stack Developer with hands-on experience building scalable, user-friendly web applications across frontend and backend layers using React, Next.js, Node.js, Express, and TailwindCSS. Skilled in designing RESTful APIs, integrating authentication, managing databases, and delivering end-to-end features through close collaboration or independent ownership. Experienced in developing real-world systems including hospital management platforms and AI-assisted applications, with emphasis on performance, maintainability, and clean architecture. Proficient in translating requirements into robust full-stack solutions using modern web technologies.

SKILLS

Languages	: JavaScript, Typescript, C, C++, Python
Frontend	: HTML, CSS, TailwindCSS, React.js, Next.js, Framer Motion
Backend & Database	: Node.js, Express.js, MongoDB, PostgreSQL, MySQL
State Management	: Redux Toolkit, RTK Query, Context API, Zustand
Tools & Dev-Ops	: Git/GitHub, Vercel, Google OAuth, Postman
Soft Skills	: Problem Solving, Technical Communication, Critical Thinking, Team Collaboration

EXPERIENCE

Frontend Developer Intern Elevate Tech. Pokhara, Nepal	Nov 2025 - Jan 2026
- Contributed to the development of TrustMed, a hospital management system using React. - Built responsive UI components and enhanced user workflows - Collaborated with backend teams for API integration and data handling	
MERN Stack Developer Intern Brandbuilder Pokhara, Nepal	Feb 2026 – April 2026
- Contributed to the development of Receipt AI, an AI-powered receipt management system - Developed the frontend using Next.js and implemented Google OAuth authentication - Integrated a peer-developed AI module for automated receipt extraction and categorization	

PROJECTS

Receipt AI – AI-Powered Receipt Management 
Built the full frontend and authentication flow, and integrated a peer-developed AI module to extract, categorize and manage financial receipt information. Implemented multi-company support with secure OAuth authentication.
Tech Stack: Next.js, Typescript, TailwindCSS, MongoDB, Google OAuth, JWT
SB Thakali – Chartered Accountant Website 
Designed and developed a modern, responsive website for a Chartered Accountant firm, featuring a full admin dashboard, secure authentication, and a custom blog management system. Deployed on Vercel for fast and reliable production hosting.
Tech Stack: React, Next.js, TailwindCSS, MongoDB, JWT, Framer Motion
Chatify– Real Time Full Stack Chat Application 
Built a real-time messaging platform with multi-device support, instant messaging, image sharing, and live user presence tracking. Implemented secure JWT authentication with HttpOnly cookies, optimistic UI updates, and Socket.IO architecture for seamless bidirectional communication.
Tech Stack: React.js, Socket.IO, TailwindCSS, MongoDB, Zustand, Cloudinary, Resend, Arcjet
TrackBoard – Real Time Kanban Board 
Engineered a high-performance, real-time task management application with a focus on seamless data synchronization and a modern "Glassmorphism" UI. Implemented Row Level Security (RLS) to ensure private data isolation and integrated complex drag-and-drop mechanics. Production deployment on Vercel.
Tech Stack: Next.js, TypeScript, Supabase (PostgreSQL), Redux Toolkit, RTK Query, TailwindCSS, Google OAuth

EDUCATION

Bachelors in Computer Engineering - Licensed Engineer (Nepal Engineering Council, NEC)	2025
Kathmandu Engineering College, TU (74.24%)	Kathmandu, Nepal
Higher Secondary Education (Science)	2020
Gandaki Boarding School (3.24 CGPA)	Gandaki Province, Nepal
Secondary Education Examination	2018
Gandaki Boarding School (3.8 CGPA)	Gandaki Province, Nepal

CERTIFICATIONS

JavaScript Algorithms & Data Structures by freeCodeCamp	May 2025
Responsive Web Design by freeCodeCamp	July 2024
Programming using Python Bootcamp by Dursikshya	July 2024
JavaScript Bootcamp by KEC IT Club	July 2023
